Off Campus Access

To get access to licensed e-resources off campus you should use an IP-checked link i.e. this one to Google Scholar:

You can also use the IP-checked links from Physics and Astronomy Library's homepage:

When you use any of these IP-checked links off-campus you will be directed to the CAS-log in and you should then use your LUCAT or STIL log in.

The IP-check link, http://ludwig.lub.lu.se/login?url= directly in front of another e-resource link results in a CAS log in where you use your LUCAT or STIL login.

If you have problems with accessing other e-resources i.e. ScienceDirect you can add the IP-check to the resources link, http://ludwig.lub.lu.se/login?url=http://www.sciencedirect.com/

- Another option is to use **VPN** (Virtual Personal Network)
  1. Find info at LDC:s support pages http://www.ldc.lu.se
  2. Search for VPN or Forticlient to get the right installation guide.
  3. Download the FortClient to your computer or the app from appropriate "app store”.

- Yet another option is to connect to your “work” computer via remote desktop

Find more information about LUCAT and STIL log in at the Lund University Libraries site at: **Access to e-resources from home**
